Corporate tax rate was decreased from 30 per cent to 22 per cent for existing domestic companies and to 15 per cent for certain new manufacturing companies.

Tax base of GST more than doubled. (68 Lakh to 1.4 crores)

91

Ex. All the statements are correct. Statement 1 accurately describes GDP at market price. Statement 2 differentiates between Real and Nominal GDP, with Real GDP adjusted for inflation. Statement 3 defines GDP at factor cost correctly. Statement 4 is true as the services sector is the largest contributor to India's GDP, surpassing both the industrial and agricultural sectors.

92 D

Ex.

93

Ex. Statement 1 is correct as the GDP growth rate is indeed a crucial measure of economic health and is calculated quarterly in India. Statement 2 reflects the structural transformation of the Indian economy from agriculture to services. Statement 3 accurately distinguishes between GDP and GNP, with GNP accounting for net income received from abroad, unlike GDP which measures domestic production.
